Our Mission

The IARS mission is to encourage, stimulate, and fund ongoing anesthesia-related research projects that will enhance and advance the specialty, and to disseminate current, state-of-the-art, basic and clinical research data in all areas of clinical anesthesia, including perioperative medicine, critical care, and pain management. The IARS is focused solely on the advancement and support of education and scientific research related to anesthesiology.

Mission Statement:

**ANESTHESIA & ANALGESIA** exists for the benefit of current and future patients under the care of health care professionals engaged in the disciplines broadly related to anesthesiology: perioperative medicine, critical care, and pain management. The Journal furthers the care of these patients by reporting the fundamental advances in the sciences of these clinical disciplines and by documenting the clinical, administrative, and educational advances that guide therapy.
