

REMIMAZOLAM-INDUCED ANAPHYLAXIS

Supplemental Table 2. Additional skin test results.

Prick test			
Test drugs	Flare diameter (mm)	Wheal diameter (mm)	Results
Histamine (positive control)	6x6	6x6	
Saline (negative control)	-	-	
LMDLI <sup>4</sup>	-	1x1	Negative
Intradermal test			
Test drugs	Flare diameter (mm)	Wheal diameter (mm)	Results
Saline (negative control)	-	7x8	
LMDLI <sup>4</sup>			
1:100 (1 mg/mL)	-	6x8	Negative <sup>B</sup>
1:10 (10 mg/mL)	-	-	Negative
Undiluted solution (100 mg/mL)	-	7x8	Negative <sup>B</sup>

<sup>A</sup> Low Molecular Dextran L Injection.

<sup>B</sup> Wheal appeared immediately after injection and remained unchanged for 15 minutes. The reactions were the same as those for the negative control.
