

## Supplemental Digital Appendix 1

**Bivariate Correlations ( $r$ ) Between Applicant Age and Academic Achievement Among the 2015–2016 Cohort of Applicants to Physician Assistant Training Programs, From a Study of Applicant Characteristics and Likelihood of Matriculation<sup>a</sup>**

Abbreviations: GRE indicates Graduate Record Examination; GPA, grade point average.  
<sup>a</sup>The size and color of the circles are scaled to the strength and direction of the correlation, respectively.

## Supplemental Digital Appendix 2

### Differences in Measures of Academic Achievement (GPA and GRE) by Gender Among the 2015–2016 Cohort of Applicants to Physician Assistant Training Programs, From a Study of Applicant Characteristics and Likelihood of Matriculation<sup>a</sup>

	Male				Female			
	No.	Mean	SD	Median	No.	Mean	SD	Median
<b>Undergraduate GPA</b>	5,923	3.3	0.4	3.3	15,261	3.4	0.4	3.4
<b>Highest GRE percentiles</b>								
Verbal reasoning	4,174	55.9	21.8	55.0	11,723	52.3	21.4	54.0
Quantitative reasoning	4,174	47.6	19.7	48.0	11,723	44.0	19.2	45.0
Analytical writing	4,170	50.1	24.0	56.0	11,720	54.3	23.0	56.0

Abbreviations: GPA indicates grade point average; GRE, Graduate Record Examinations.

<sup>a</sup>All mean differences by gender were statistically significant ( $P < .001$ ).
