700 patients with cirrhosis

- 231 with prior OHE
  - 50 without CHE
  - 181 with CHE
    - 90 (38%) developed OHE hospitalization over 2 years
- 469 without prior OHE
  - 235 with CHE
    - 6 (2.5%) developed OHE hospitalization over 2 years
  - 234 without CHE
    - 6 (2.5%) developed OHE hospitalization over 2 years

Figure S1: Flow of patients based on CHE, prior OHE or both.

CHE: covert hepatic encephalopathy, OHE: overt hepatic encephalopathy
