

SUPPLEMENTAL DIGITAL CONTENT 5:

Discrimination (c-statistic) of POSPOM with medical history variables and age alone in each type of surgery considered in the study

Surgery	Percent of patients (%)	POSPOM C-statistic
Endoscopic digestive	24.26	0.688
Other orthopedic	17.87	0.939
Gynecologic	8.81	0.947
Minor gastrointestinal	7.56	0.901
ENT	6.26	0.949
Plastic	5.33	0.859
Minor urologic	5.11	0.876
Arthroplasty and spine	5.09	0.870
Others surgery	3.95	0.851
Minor vascular	3.17	0.885
Minor hepatic	2.20	0.863
Orthopedic trauma	1.76	0.722
Major gastrointestinal	1.65	0.784
Neuro	1.48	0.662
Interventional cardiorhythmology	1.39	0.757
Major urologic	1.12	0.866
Cardiac	0.87	0.608
Thoracic	0.64	0.749
Major vascular	0.58	0.712
Ophthalmologic	0.47	0.822
Major hepatic	0.16	0.697
Interventional neuroradiology	0.09	0.761
Multiple trauma related	0.08	0.602
Renal transplant	0.06	0.870
Transplant	0.04	0.517

POSPOM : PreOperative Score to predict PostOperative Mortality
