

Supplemental Digital Content 2, Figure 1: Severity of pre-operative pain upon coughing (NRS, 0-10) for those patients with (red triangles) vs without (black circles) chronic pain related to thoracic surgery at 6 months.

NRS: numerical rating scale

Supplemental Digital Content 2, Figure 2: Observed vs expected severities of pain for those patients who identified themselves as having (upper right 3 panels) vs not having (bottom left panels) thoracic surgery related pain at 6 months.

NRS: numerical rating scale, POD: post-operative day, r = Pearson correlation coefficient, p: associated p-value.
