

Supplemental Figure 4: Visual Predictive Check for Neuromuscular Blockade (%) Versus Time of the PK-PD Model

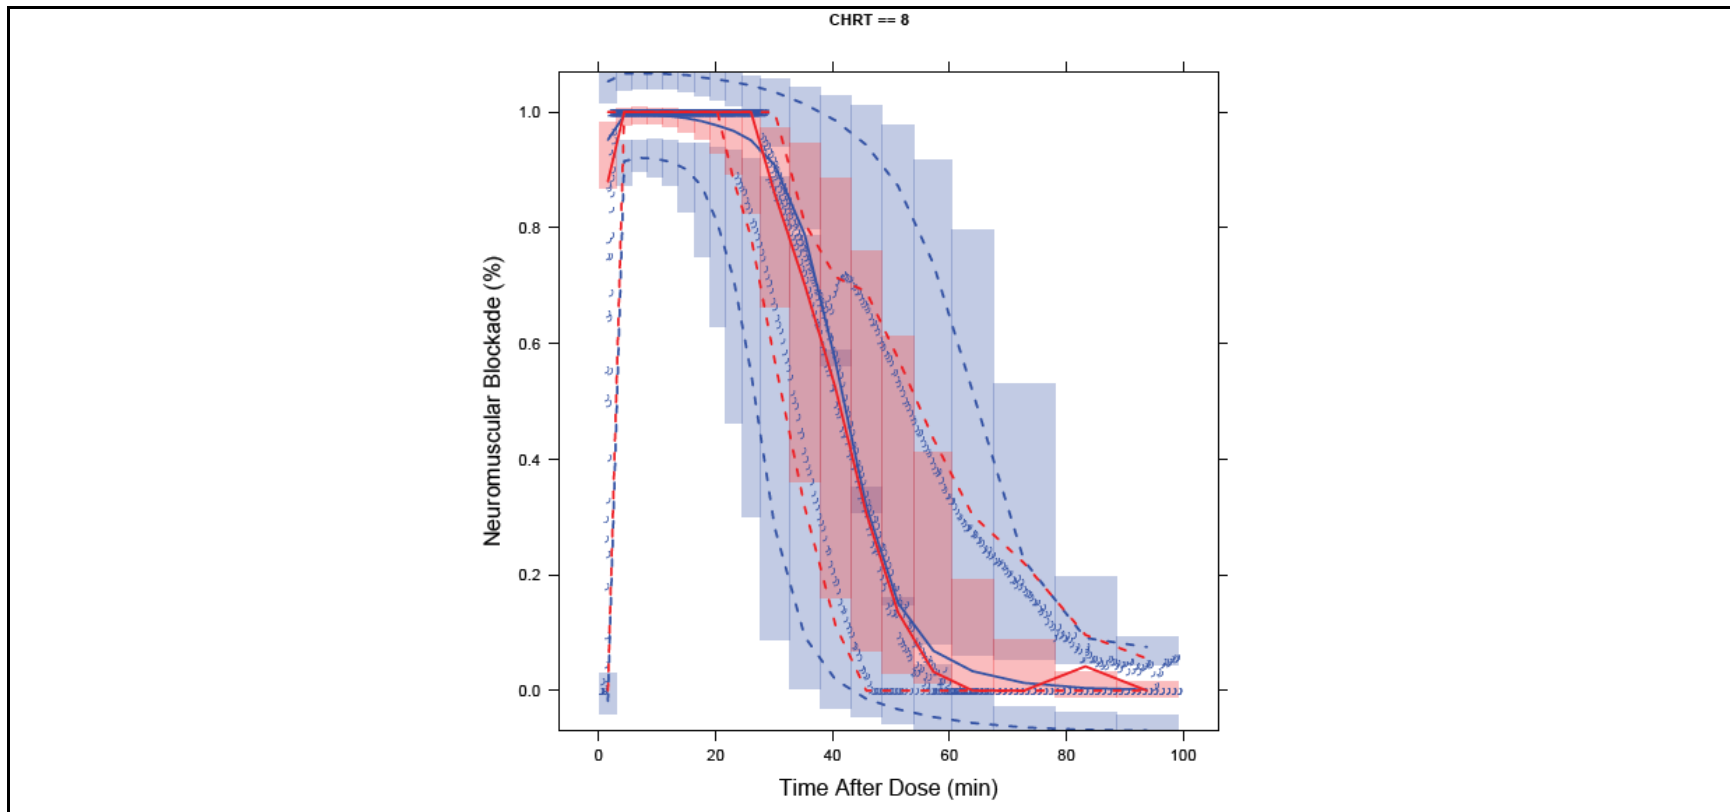

CHRT == 5

CHRT == 6

Note: CHRT = Cohort; Neuromuscular blockade ranges from 0.0 to 1.0, (0% to 100%) respectively.

Data: Blue circles = Observations of Neuromuscular Blockade (%); Solid red line = Median; Dashed red line = 5th and 95th percentiles.

Predictions: Shaded grouping of bins. Orange = Median with confidence interval; Blue = 5th and 95th percentiles with confidence intervals; Solid blue line = Median; Dashed blue line = 5th and 95th percentiles.
