Figure S6. Validation results for spatial distribution of voxel-wise energy efficiency during three anesthesia states using different correlation thresholds. (A) The threshold was set at r > 0. (B) The threshold was set at r > 0.1. (C) The threshold was set at r > 0.2. (D) The threshold was set at r > 0.3. (E) The threshold was set at r > 0.4. (F) The threshold was set at r > 0.5. (G) The threshold was set at r > 0.6. (H) The threshold was set at r > 0.7. (I) The threshold was set at r > 0.8.
