These screenshots represent the initial landing page for the smartphone and the screen that summarizes the patient’s most recent laboratory results. The app has a simple decision support system built into it that highlights off-normal lab results and considerations for their implications.
These screenshots represent the summary of the Medication Administration Record (MAR) for the patient (Frank Phillips). The information provides a high-level prestation of the medications currently ordered along with dosage and concerns or contraindications. The app provides a suggested calculated dosage based on current patient information and a dose calculator.
