

**Supplementary Table 1:** Demographic data and underlying diseases of patients with pulmonary aspergillosis and patients without pulmonary aspergillosis

Items	Aspergillosis (n=41)	Non-aspergillosis (n=95)	<i>P</i> value
Sex (male/female)	19/22	57/38	0.141
Median age (years), Range	57.7 (38.0–76.0)	53.8 (18.0–80.0)	0.337
Underlying pulmonary disease			
Previous tuberculosis	9	2	<0.001
COPD	12	10	0.010
Bronchiectasis	6	25	0.182
Extrapulmonary disease			
Diabetes	3	4	0.452
Cardio cerebrovascular disease	8	15	0.595
Autoimmune disease	5	4	0.086

COPD: Chronic obstructive pulmonary disease.
