

Interview 2 Guide

1. How have your thoughts on career choice changed since we last spoke?
 - 1.1 Last time you mentioned that you were interested in [x specialties]. Has that changed?
 - 1.2 How have your thoughts about neurology changed?
 - 1.3 Last time you mentioned that [x factors] were important to you. Which factors are most important to you now in choosing a specialty?
 - 1.3.1 How has this changed?
 - 1.4 Here are a list of the top 10 factors that came up most frequently in my conversations with you and your classmates last time. [Hand physical list to interviewee.]
 - 1.4.1 Anything that surprises you?
 - 1.4.2 If you had 100 points, how would you distribute the point values amongst the different factors?
 - 1.4.3 What factors are missing from this list?
2. How have the sequences you've taken since we last spoke affected your thoughts about your eventual career choice?
 - 2.1 How has the neurology sequence affected how you view neurology?
3. How have your other experiences (such as [provide specific examples from the curriculum] or volunteer work) since we last spoke affected your thoughts about your eventual career choice?
4. Aside from the neurology sequence, what exposures have you had to neurology, if any, since we last spoke?
 - 3.1 [If additional exposure] How has that exposure affected your interest in neurology as a career?
5. Imagine that you are 6 months from now in the middle of clerkships. How might your perspective on specialty choice change?
