

	Concentric		Eccentric	
	r PCC [CI 95%]	p-value	r PCC [CI 95%]	p-value
<i>Quadriceps</i>	0.938 [0.882/0.968]	†	0.942 [0.889/0.970]	†
<i>Hamstrings</i>	0.872 [0.762/0.933]	†	0.892 [0.798/0.944]	†

Supplemental Table 4: Pearson's *r* product–moment Correlation Coefficient with 95% confidence interval and associated *p*-value for isokinetic concentric and eccentric testing session between Peak Torque and Maximal Work data. The significant *p*-values (< 0.05) are in boldface type (the acronym † stands for *p*-value < 0.0001).
