

Supplemental File 1. ICD-9 & ICD-10 Diagnosis Codes and Current Procedural Terminology (CPT) Codes Used for Surgical Approaches for Rectal Prolapse

ICD-9 Diagnosis Code

569.1 – Rectal Prolapse

ICD-10 Diagnosis Code

K62.3 – Rectal Prolapse

CPT Codes:

Open Approach:

45540 – Proctopexy, abdominal approach

45550 – Proctopexy with sigmoid resection, abdominal approach

Minimally Invasive Approach:

45400 – Proctopexy, laparoscopic approach

45402 – Proctopexy with sigmoid resection, laparoscopic approach

Perineal Approach:

45130 – Excision of rectal procidentia with anastomosis (Altemeier), perineal approach

45505 – Proctoplasty for prolapse of mucous membrane (Delorme), perineal approach

45541 – Proctopexy, perineal approach

Resection Rectopexy Codes:

45550 – Proctopexy with sigmoid resection, abdominal approach

45402 – Proctopexy with sigmoid resection, laparoscopic approach

45130 – Excision of rectal procidentia with anastomosis (Altemeier), perineal approach
