

ATTENTION PROVIDER:

1-2 hours after administration of initial HF medications, return to the "ED HF Clinical Decision" menu and select option "Step 3: Clinical Decision Guide: MD Re-evaluation".

**Reason for Request:**

Nursing staff: Document and notify MD of the following information 1-2 hours after initial HF medication administration: (1) O2 sat, (2) vital signs (TPR & BP), (3) urine output, (4) lab results, and (5) any new or continued heart failure symptoms.
