Supplemental Digital Content 4. Visual impairment in patients with RHO-associated retinitis pigmentosa (RP) by decades of life, classified as either generalized RP or sector RP. A, Visual impairment based on last available best-corrected-visual acuity (BCVA), based on the criteria of the World Health Organization (WHO): No visual impairment (BCVA $\geq$ 20/40), mild visual impairment (20/67 $\leq$ BCVA < 20/40), low vision (20/200 $\leq$ BCVA <20/67), severe visual impairment (20/400 $\leq$ BCVA < 20/200) or blindness (BCVA < 20/400). B, For visual impairment based on last available central visual fields (central VF; V4e), the following endpoints were used: mild visual impairment (20° $\leq$ central VF < 70°), low vision (central VF < 20°) and blindness (central VF < 10°).
