

Supplemental Digital Content 3. *In vitro* CSF isolate susceptibility to the combination of penicillin and gentamicin by year.

Year	Number tested to pen/gent	Number not susceptible to pen/gent	Percentage not susceptible
2002	34	4	11.8
2003	51	5	9.8
2004	34	3	8.8
2005	43	1	2.3
2006	29	4	13.8
2007	36	3	9.1
2008	22	0	0

Data only includes isolates tested to at least one of penicillin and gentamicin. pen = penicillin, gent = gentamicin

χ^2 for trend 1.11, p = 0.291
