

Supplemental Table B. Perceptions of potential barriers to osteoporosis care among residents

Characteristic	No formal program (mean)	OTB or any FLS (mean)
Lack of time within a busy clinical program for a non-operative care rotation	7	6
Absence of institutional leadership on this issue	5	3
Lack of consultants and experts to provide osteoporosis care and hands-on education	5	4
Poor reimbursement for osteoporosis care	6	4
Poor motivation of faculty to teach and learn about osteoporosis care	5	4
Poor motivation of residents to learn about osteoporosis care	5	5
Perception that osteoporosis is not within orthopaedic sphere of care	4	3
Inadequate availability of DXA testing	5	3
Not an important topic due to minimal testing on OITE and ABOS	5	4

Responses to a 10-point Likert scale on agreement (0 = completely disagree to 10 = completely agree); DXA = Dual-energy X-ray absorptiometry; OITE = Orthopaedic Intraining Exam; ABOS = American Board of Orthopaedic Surgery.
