**Supplement S1**. Graphical depiction of data distributions, averages, and variances for each group (gabapentin vs no gabapentin) and each outcome measure.
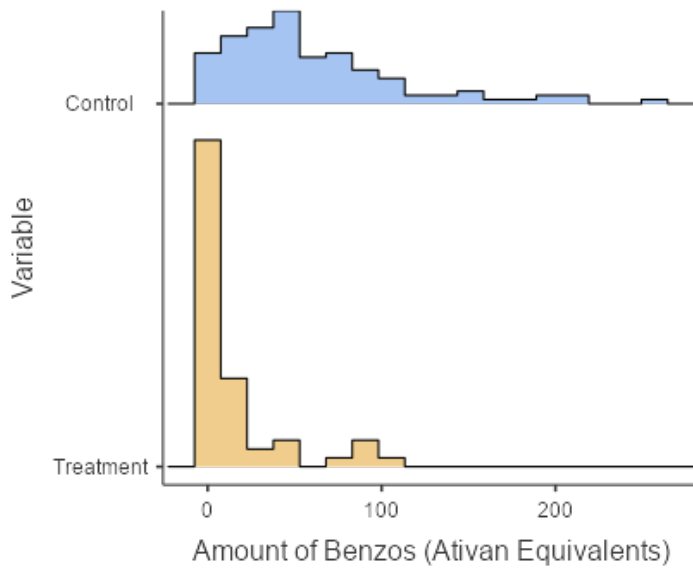

S1 Figure 1a. Histogram of the length of hospital stay (LOS) in day; minimum value = 1.

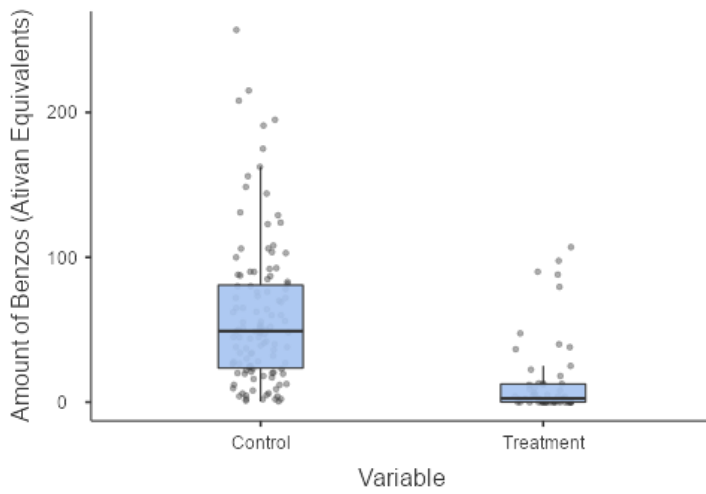

S1 Figure 1b. Box and whisker plot of the length of stay for each group; minimum value = 1.

S1 Figure 2a. Histogram of the total amount of benzodiazepines were administered during hospital stay (BZ_AMT).

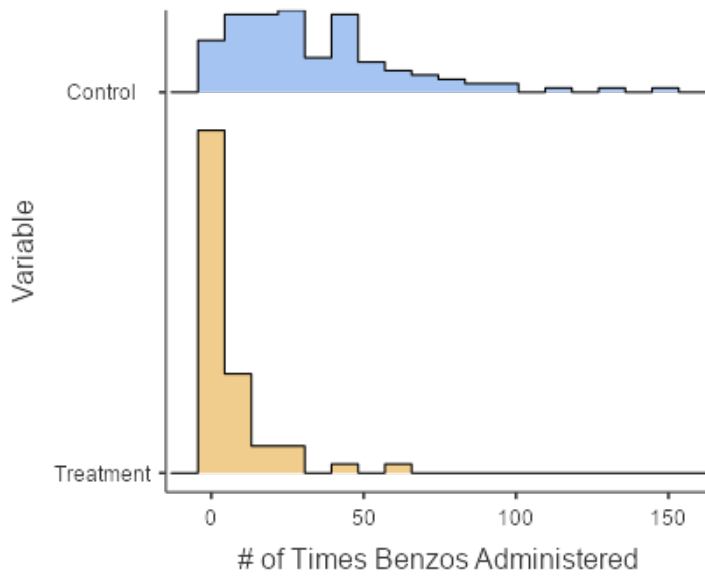

S1 Figure 2b. Box and whisker plot of the total amount of benzodiazepines administered during hospital stay (BZ_AMT).

S1 Figure 3a. Histogram of the number of times benzodiazepines were administered.
* Note: Number of times benzodiazepines were administered was highly correlated (r = .95) with total amount (BZ_AMT), and thus was not formally analyzed in the results due to redundancy.

S1 Figure 3b. Box and whisker plot of the number of times benzodiazepines were administered.
