Supplemental Figure 1. Analytical timeline for the HEMO cohort (panel A) and large dialysis organization cohort (panel B).

A.

Biochemical, medication, and HD treatment data at monthly monitored treatments

Demographic and co-morbid data

Baseline Exposure Assessment Period (~6 months)

Baseline (study entry: 1996-2000)

HEMO randomization

4 months post randomization

Mortality assessment

End of study (2 years post baseline)

time a →

B.

Biochemical, medication, and HD treatment data at routine thrice weekly treatments

Demographic and co-morbid data

Baseline Exposure Assessment Period (30 days)

Baseline (study entry: 2005-2006)

Day 1 Baseline

Day 30

Mortality assessment

End of study (1 year post baseline)

time a →

a Time not drawn to scale.
