Supplemental Figure SF1: Patients’ laboratory values over time on a logarithmic scale. A = patient 1, B = patient 2, C = patient 3. The dashed vertical lines depict HLH diagnosis and initiation of the stepwise immunosuppressive therapy regimen as described in the text. WBC = white blood cell count; CRP = C-reactive protein; IL-6 = interleukin 6; NTproBNP = NTpro natriuretic peptide. G = giga; L = liter; mg = milligram; ng = nanogram; pg = picogram.
