Table S4. Ultrasound Staging used in patients with or without placenta previa and their relationships with intraoperative outcomes

		Gestational weeks at termination*	Hysterectomy [§]	Intraoperative bleeding*	Blood transfusion*			
					Red blood cell	Plasma	Autologous blood transfusion	Fibrinogen
US staging	p	0.000	0.001	0.000	0.000	0.000	0.000	0.062
	0	36	0/40(0.0)	750	0	0	0	0
	1	35	1/22(5.00)	1200	200	0	185	0
	≥2	34	8/43(18.6)	1700	400	200	400	0

* Kruskal-Wallis test

§ Chi-square test
