

**Table 2:** Responses of undergraduate nursing students regarding the acceptance of online education (n = 344)

| <b>Item</b>  | <b>Disagree<br/>(N)</b> | <b>Percentage<br/>(%)</b> | <b>Agree<br/>(N)</b> | <b>Percentage<br/>(%)</b> |
|--|-------------------------|---------------------------|----------------------|---------------------------|
| I can access the subject easily and clearly.   | 230                     | 67%                       | 114                  | 33%                       |
| The internet speed is appropriate; I was able to attend lectures without any breaks in transmission.   | 296                     | 86%                       | 48                   | 14%                       |
| Adequate information is provided to enable me to use the private site educational material.  | 230                     | 70%                       | 114                  | 33%                       |
| There is appropriate technical assistance from the university to facilitate the use of various means of technology to access information on the educational subject. | 258                     | 75%                       | 86                   | 25%                       |
| The online content about the scientific material is comprehensive and full.  | 268                     | 78%                       | 76                   | 22%                       |
| The content is displayed online in an interesting and non-boring way.  | 300                     | 87%                       | 44                   | 13%                       |
| The information obtained from the scientific material equals that which we can get from traditional education methods.   | 298                     | 87%                       | 46                   | 13%                       |
| The content includes exercises and assignments that help me in learning the subject.   | 256                     | 74%                       | 88                   | 26%                       |
| The distance learning method helped me understand the scientific subject smoothly and clearly.   | 288                     | 84%                       | 56                   | 16%                       |
| The presentation of the scientific material online provided me with training and additional skills.  | 288                     | 84%                       | 56                   | 16%                       |
| Using the distance learning method helped me to develop my thinking skills.  | 262                     | 76%                       | 82                   | 24%                       |
| I feel a general sense of relief from being able to study the subject electronically.  | 298                     | 87%                       | 46                   | 13%                       |
| There are problems and obstacles encountered when studying the subject electronically.   | 156                     | 45%                       | 188                  | 55%                       |

|  |     |     |     |     |
|--|-----|-----|-----|-----|
| I can ask any questions during distance learning and I am answered.                                      | 240 | 67% | 104 | 33% |
| Sending and receiving educational materials was possible without any hindrance.                          | 258 | 75% | 86  | 25% |
| There is continuous coordination between you and the subject teacher about the content displayed online. | 240 | 70% | 104 | 30% |
| Simulation is used when there is a need.   | 288 | 84% | 56  | 16% |
| I am continuously evaluated during the distance learning process.  | 246 | 72% | 98  | 28% |
| The evaluation methods used are appropriate and are undertaken in a variety of ways.                     | 280 | 81% | 64  | 19% |
| I think remote tests are a good way to assess learning.  | 258 | 75% | 86  | 25% |
