Supplemental Figure 1. TREATING NEUROPATHIC PAIN

First-line agents: gabapentinoids ↔ tricyclic antidepressants ↔ serotonin-norepinephrine reuptake inhibitors

Second-line agents: tramadol ↔ opioid analgesics

Third-line agents: cannabinoids

Fourth-line agents: topical lidocaine, methadone, lamotrigine, lacosamide, tapentadol, and botulinum toxin

If partial but not adequate pain relief, adding additional agents gradually may be beneficial (limited data to support)
