Supplemental Figure 2. SIBBALD CUBE

Consider a systemic anti-inflammatory if there is a high protease activity test.

Low Protease Activity

High Protease Activity

Low Bacteria

High Bacteria

Moisture balance dressing

Antimicrobial

NERDS (any 3 treat topical)

Non-Healing

Exudate ↑

Red friable tissue

Debris

Smell

STONEES (any 3 treat systemic)

Size ↑

Temperature ↑

Oozing (to bone)

New satellites

Smell

An additional criterion is needed to distinguish bacterial damage:
Superficial/Deep or Both.
