

Supplemental Table 3. COMPARATIVE DESIRABILITY OF CRITERIA ACROSS THE SIX MODALITIES OF DEBRIDEMENT FOR A HEALABLE WOUND

Criteria^a	Autolytic	Mechanical	Enzymatic	Biological (Maggots)	CSWD	SSD
Speed	6	3	6	4	2	1
Selectivity	2	6	2	3	4	5
Pain	1	5	2	3	4	6
Exudate	5	3	5	6	2	1
Infection	6	3	6	2	4	1

Abbreviations: CSWD, conservative sharp wound debridement; SSD, sharp surgical debridement.

^aThis table compares factors across six debridement methods where 1 is most desirable and 6 is least desirable, based on expert opinion.
