

APPENDIX

Demographic data and visual fields of glaucoma patients. Δt is the time since first diagnosis. Patients who failed the driving fitness test are shaded in gray.

Visual Fields of Glaucoma Patients

Gender Age [yrs.]	Δt [yrs.]	Pathogenesis	Visual field defect (90° eccentricity, both eyes, stimulus III4e)
m 59	15	Superior altitudinal visual field loss respecting the horizontal meridian	
f 71	5	Circumscribed superior paracentral scotomas	
f 62	5	Inferior arcuate defect and superior circumscribed paracentral scotoma within 20° eccentricity	
m 66	18	Inferior arcuate defect and inferior paracentral scotoma within 20° eccentricity	
f 59	14	Circumscribed superior paracentral scotoma	
m 52	23	Superior arcuate defect and inferior paracentral scotoma within 10°-20° eccentricity
