## Patient Perspective

When appropriate the patient should share their perspective on the treatments they received.

## Discussion

The Discussion of the Intervention adherence and tolerability (How was this assessed?)

## Follow-up and Outcomes

- **10a** Clinician and patient-assessed outcomes (when appropriate).
- **10b** Important follow-up diagnostic and other test results.
- **10c** Intervention adherence and tolerability (How was this assessed?)

## Conclusion

The main diagnoses, therapeutics interventions, and outcomes.

## Case Report

One or two paragraphs summarizing why this case is unique with references.

## Title

The words “case report” should be in the title along with the area of focus.

## Key Words

2 to 5 key words that identify areas covered in this case report.

## Abstract

- **3a** Introduction—What is unique about this case? What does it add to the medical literature?
- **3b** The main symptoms of the patient and the important clinical findings.
- **3c** The main diagnoses, therapeutics interventions, and outcomes.
- **3d** Conclusion—What are the main “take-away” lessons from this case?

## Introduction

One or two paragraphs summarizing why this case is unique with references.

## Patient Information

- **5a** De-identified demographic information and other patient specific information.
- **5b** Main concerns and symptoms of the patient.
- **5c** Medical, family, and psychosocial history including relevant genetic information (also see timeline).
- **5d** Relevant past interventions and their outcomes.

## Clinical Findings

Describe the relevant physical examination (PE) and other significant clinical findings.

## Timeline

Important information from the patient’s history organized as a timeline.

## Diagnostic Assessment

- **8a** Diagnostic methods (such as PE, laboratory testing, imaging, surveys).
- **8b** Diagnostic challenges (such as access, financial, or cultural).
- **8c** Diagnostic reasoning including other diagnoses considered.
- **8d** Prognostic characteristics (such as staging in oncology) where applicable.

## Therapeutic Intervention

- **9a** Types of intervention (such as pharmacologic, surgical, preventive, self-care).
- **9b** Administration of intervention (such as dosage, strength, duration).
- **9c** Changes in intervention (with rationale).

## Follow-up and Outcomes

- **10a** Clinician and patient-assessed outcomes (when appropriate).
- **10b** Important follow-up diagnostic and other test results.
- **10c** Intervention adherence and tolerability (How was this assessed?).
- **10d** Adverse and unanticipated events.

## Discussion

- **11a** Discussion of the strengths and limitations in your approach to this case.
- **11b** Discussion of the relevant medical literature.
- **11c** The rationale for conclusions (including assessment of possible causes).
- **11d** The primary “take-away” lessons of this case report.

## Patient Perspective

When appropriate the patient should share their perspective on the treatments they received.

Did the patient give informed consent? Please provide if requested.
