1. Demographic Data

Sex
- Female
- Male
- Diverse

Age in years: ___________________

Mother tongue
- Bengali
- English

- Other, please specify: ___________________________

Education
- No school leaving certificate
- School leaving certificate
- University degree
- Currently in school

Employment
What is your current employment status?
- Full-time employment
- Part-time employment
- Unemployed
- Not able to work due to pain
- Retired
- Homemaker

Does your chronic pain have an impact on your employment status?
- Yes
- No
2. Pain History

The following questions will help us to gain a basic understanding of your chronic pain and your pain history. For each category, please circle the number on the scale that best describes your chronic pain.

Pain intensity

On a scale of 0 (no pain) to 10 (worst pain imaginable), how strong or intense was your chronic pain last week on average? Please circle the number that best describes your average pain intensity over the course of last week.

<table>
<thead>
<tr>

<td>Worst pain imaginable</td>
</tr>
</tbody>
</table>

Temporal course of the pain

How would you describe your chronic pain over the course of last week?

- Persistent (always there)
- Recurring with pain-free intervals (sometimes there, sometimes not)
- Persistent with overlapping pain attacks (always there with additional attacks)

Pain-related interference

Some people with chronic pain find that their pain interferes with their daily activities. For example, it gets in the way of work, exercise, or sleep. On a scale of 0 (no interference) to 10 (total interference in all aspects of life), please circle the number that best describes the degree of pain-related interference over the course of last week.

Pain-related distress

Some people with chronic pain report distress in relation to their pain (e.g., low self-esteem, hopelessness, worries, or anger). On a scale of 0 (no pain-related distress) to 10 (extreme pain-related distress), please circle the number that best describes your degree of pain-related distress over the course of last week.

Age of pain onset

How old were you when your chronic pain first began?

C. Code Assignment and Evaluation Form (CAEF)

1. Code Assignment

1. Please state all diagnostic codes or diagnostic terms that you would assign normally to this patient (ICD-10 codes if applicable). Only list chronic pain diagnoses and diagnoses for an underlying etiology, if applicable.
   
   For example: R52.2 Other chronic pain
   
   (1) ________________________________________________________________
   (2) ________________________________________________________________
   (3) ________________________________________________________________
   (4) ________________________________________________________________
   (5) ________________________________________________________________

2. Please state all ICD-11 chronic pain diagnoses that apply to this patient. In the case of chronic secondary pain, please also list the name of the underlying disease behind the pain diagnosis.
   
   For example: MG30.30-C Chronic secondary musculoskeletal pain from persistent inflammation + Rheumatoid arthritis
   
   (1) ________________________________________________________________
   (2) ________________________________________________________________
   (3) ________________________________________________________________
   (4) ________________________________________________________________
   (5) ________________________________________________________________

3. If “other specified” – please specify here by listing the specific diagnoses:
   
   (1) ________________________________________________________________
   (2) ________________________________________________________________
   (3) ________________________________________________________________
4. If “unspecified” – please indicate the reason why no diagnosis could be assigned
   
   o Necessary test to confirm an underlying disease could not be performed
   
   o Necessary test to exclude an underlying disease could not be performed
   
   o Unsure which category applies
   
   o Missing information (other than test results)
   
   o Other:
   
   5. How long did you need for the diagnostic algorithm (in minutes)?

   _______________________

   6. How long did it take you to assign the ICD-11 diagnoses after the diagnostic assessment (in minutes)?

   _______________________

   7. Was a diagnostic test required for this patient to confirm or to exclude an underlying disease (e.g., blood sampling, X-rays)?

   o Yes

   o No
If a diagnostic test was required:

7.a Did you perform the required diagnostic test?
   - Yes
   - No

7.b If you performed the diagnostic test, did you interrupt the diagnostic assessment for it and continued it later, i.e., when the test results were available?
   - Yes
   - No

7.c Would you have performed the same test during a routine diagnostic assessment of this patient?
   - Yes
   - No

7.d If you did not perform the diagnostic test, what was the reason?
   - The required test was not available
   - The required test result was available in the patient’s medical records
   - No reimbursement for the required test
   - Lack of time
   - Other reason, please specify:

____________________________________________________
2. Pain Specifiers

I have checked and documented the chronic pain specifiers during the diagnostic assessment on the diagnostic algorithm introduction form.

○ Yes

○ No

Please remember to file the diagnostic algorithm introduction form together with this form.

**Presence of psychosocial factors**

Are psychosocial factors (e.g., fear of pain, pain catastrophizing, social withdrawal, avoidance) present that influence this patient’s chronic pain?

Yes ☐ No ☐ Unsure ☐

**If yes:** Please specify briefly, which psychosocial factors are present:

______________________________________________________

______________________________________________________

______________________________________________________
3. Evaluation
