Supplementary figure
Mean (±95% CI) change from baseline to week 48 in fasted A) total cholesterol, B) LDL-cholesterol, C) HDL-cholesterol, D) total cholesterol/HDL-cholesterol ratio, E) triglycerides. Pooled population of patients with baseline viral load ≤100,000 copies/ml.
†P value vs. EFV at week 48 (non-parametric Wilcoxon rank-sum test). RPV, rilpivirine; EFV, efavirenz; CI, confidence interval; LDL, low-density lipoprotein; HDL, high-density lipoprotein
