

Fig. S-6. Drug efflux transporters and metabolic enzymes levels in T-cells isolated PBMCs and testes. The level of expression of drug efflux transporters(A-B) and metabolic enzymes (C-D) in testicular and circulating CD4+ (CD3+CD8- in testis) and CD8+ T-cells determined by median fluorescence intensity (MFI). Data is expressed as mean \pm SEM, n = 6/group for transporters and n = 5/group for metabolic enzymes.
