

Supplemental Figure 2. Heatmap of Tissue-Specific Biomarkers Stratified by Timepoint and Injury Severity in PAMPer Cohort

Number of subjects in each group: 30 Low injury severity score (ISS) controls, 9 (Mild [ISS \leq 15] 0h), 36 (Moderate [ISS 16-24] 0h), 67 (Severe [ISS $>$ 25] 0h), 9 (Mild 24h), 32 (Moderate 24h), 63 (Severe 24h), 9 (Mild 72h), 32 (Moderate 72h), 62 (Severe 72h).

* Represents significant elevation with adjusted p-value <0.1 across injury severity groups
