

# Global Transplantation Covid Report March 2020

COVID 19 pandemic

Transplant patients are vulnerable

Communication is of critical importance

This report shares our thoughts on how the transplantation community is dealing with this crisis

## COMMON THEMES

1. **Hospital** facilities and workforce for transplantation
2. **Risks** of transmission
3. **Prioritization** of Intensive Care capacity
4. **Concern** about creation of high risk immunosuppressed patients
5. **Remote** monitoring
6. **No agreement** on how to manage immunosuppression
