

Clinical implementation of prolonged Liver Preservation and Monitoring through Normothermic Machine Perfusion in Liver Transplantation

NMP Indications

Interdisciplinary approach to NMP in clinical routine

NMP in a multidisciplinary approach enables safe prolongation of liver preservation and overnight organ care

- 25 successful transplants
- 92% ECD livers
- 100% 30-day patient survival
- 0% ITBL (Ischemic Type Biliary Lesions)
- Omit nighttime procedures
