Figure S1.
Linear relations between percentage globally sclerotic glomeruli in the non-donated kidney and the corresponding GFR at 1-year follow-up in donors (A), and percentage globally sclerotic glomeruli in the donated kidney and the corresponding GFR at 1-year follow-up in recipients (B). GFR, glomerular filtration rate.

Figure 2.
Linear relations between arteriolar media:lumen ratio in the non-donated kidney and the corresponding GFR at 1-year follow-up in donors (A), and arteriolar media:lumen ratio in the donated kidney and the corresponding GFR at 1-year follow-up in recipients (B). GFR, glomerular filtration rate.
