

**eTable 1. Classification criteria for eosinophilic granulomatosis with polyangiitis according to the 2022 American College of Rheumatology / European League Against Rheumatism**

Clinical Criteria	Obstructive airway disease	+3
	Nasal polyps	+3
	Mononeuritis multiplex	+1
Laboratory Biopsy Criteria	Serum eosinophil count $\geq 1$ ( $\times 10^9/L$ )	+5
	Extravascular eosinophilic predominant inflammation on biopsy	+2
	cANCA or anti-PR3-antibody positive	-3
	Hematuria	-1

Sum score  $\geq 6$  needed for classification of eosinophilic granulomatosis with polyangiitis.

Abbreviation: cANCA, cytoplasmic anti-neutrophil cytoplasmic antibody; PR3, proteinase 3
