

Study Characteristics extracted

1. Author name
2. Year Published
3. Country
4. Study period
5. Design
6. Population
7. Number of patients
8. Diagnostic criteria
9. Patient inclusion/exclusion criteria
10. Age characteristics
11. Gender balance
12. Funding
13. Conflicts of interest

Economic data extracted

1. Source of cost data
2. Costs included
3. Currency
4. Conversion rate
5. Discounting (if applicable)
6. Number and cost of emergency room visits
7. Number and cost of outpatient visits
8. Number and cost of GP visits
9. Number, days and cost of inpatient admissions
10. Number and cost of psychological therapy sessions
11. Number and cost of other multi-disciplinary (MDT) sessions
12. Number and cost of anti-Seizure medication
13. Number and cost of other medication
14. Number and cost of laboratory tests
15. Number and cost of diagnostic imaging examinations
16. Number and cost of EEGs
17. Number and cost of other investigations
18. Days and cost of productivity loss
19. Out-of-pocket costs
20. QALY measurement
21. Overall cost per patient
