

Table e1. Visual Symptoms in Concussion

	Percentage of concussed patients with the symptom (n=20)
Lose place while reading*	60
Reduced or inefficient reading speed*	50
Light sensitivity*	50
Trouble keeping attention when reading	50
Words run together when reading*	40
Decreased reading comprehension*	40
Unable to read continuous text comfortably	40
Words blurring or coming in and out of focus*	35
Eye strain*	35
Visual fatigue	35
Difficulty scanning/navigating	30
Glare sensitivity	30
Visual motion sensitivity	25
Depth perception problem	15
Poor eye-hand coordination	15
Burn, itchy, watery eyes	10
Double vision	10
Seeing floor tilted	10
Aching eyes	10
Dizzy/nausea when reading	5
Head tilt/close one eye when reading	5
Bumping into objects/walls	5
Color vision problem	5
Problem with spatial relation among objects	5
Objects appear to move when not moving	5
Unable to see entire picture or its parts	5
